

Call for Application Presentations

8th European Conference on Case-Based Reasoning ECCBR 2006

-INDUSTRY DAY-

Ölüdeniz/Fethiye, Turkey
4 September 2006

<http://2006.eccbr.org/>

We are inviting you to present an application of Case-Based Reasoning at the Industry Day of the 8th European Conference on Case-Based Reasoning.

ECCBR 2006 will be held in Ölüdeniz/Fethiye, Turkey, from September 4-7, 2006 (<http://2006.eccbr.org/>). This scientific conference will involve invited talks, presentations, and posters on fundamental research in and applications of CBR. The first day of the ECCBR (September 4, 2006) is devoted to an "industry day." While the three-day scientific part of the ECCBR 2006 is devoted to research in CBR, the Industry day aims at bringing together users of CBR technology to exchange their experience with each other and with potential users who want to evaluate the applicability of CBR in their company. The industry day facilitates the exchange of hands-on experience on how to develop and utilize CBR in cutting edge applications for help-desks, e-business, diagnostics and other knowledge management applications.

At this time, we are soliciting presentations about successfully deployed industrial applications of Case-Based Reasoning to be delivered during the industry day. The application should be deployed and, ideally, feedback from users and business should be available. The presentation should contain an introduction to the company, the problem statement/business objectives, implementation-design choices, resulting application with walk-through, organizational impact, user feedback and results/business benefits, next steps and a potential demo. Presentations from CBR software vendors should focus on applications of CBR, not the tool used. Presentations by the customers of CBR vendors are highly encouraged.

Colleagues interested in giving a presentation need to submit a one page description of their application by email to William Cheetham and Kareem Aggour no later than May 15th, 2006. The program committee will review the proposals and notify the presenters by May 30th, 2006. For applications accepted for presentation at the industry day, the speaker is expected to deliver a set of PowerPoint slides for a 30 minute talk to the program committee no later than July 4th, 2006. No formal paper is required.
